

AI Research Inc. is a Specialty Clinical Research Organization (CRO), providing business partners with world-class clinical research support services through highly experienced and medically trained staff for all phases of clinical trials.

**All our CRA's are Registered nurses**

**Our RN staff is strategically located throughout the United States and Canada**

## The AI Research Inc. Difference

Our staff are all Registered Nurses which allows us to function well in hospital settings when carrying out clinical trial monitoring and training of hospital staff. AI Research Inc. implements qualified solutions, methodology and provides clinical monitors who are experienced in multiple therapeutic areas. With over 20 years in service, we provide expert clinical monitoring across North America and Canada, specializing in pharmaceutical, biotechnology and medical device studies. Our team of Registered Nurses excels in performing timely, cost-effective and complete processes from pre-study qualification through closeout visits with meticulous attention to detail.
